

Open your eyes to a green paradise.
A world of hills, valleys, clouds and oases.
Of hidden designs and sense gardens.
Where your own house amidst infinite
greens waits to lure you to a fairytale
never heard before.

Way to BOTANICA

BOTANICA Greenfinity Abodes

Premium bungalows for just 232 families at Jagaddal just 1.5 kilometres from the Southern Bypass and 2 kilometres from NSC Bose Road. Replete with landscaping of a global stature, first of its kind in the city, spread on about 11 acres.

Inspired by the historical Botanical Garden in Howrah, BOTANICA will have a unique 25000 sqft hillscape Clubhouse, a first of its kind in Kolkata. It will have a scientific orientation ... two-sides open and a skylight roof that will offer 96% to 100% daylight in each bungalow.

Luxurious houses with open gardens, backyard lawns and green terraces, BOTANICA will be a unique home that's like a fairytale in a wonderland.

Enjoy the 'Journey of the valley' here with landscaping and architectural themes like hills, valleys, oases and botanic clouds.

The gateway

Journey of the valley

BOTANICA is designed with a unique concept called the 'journey of the valley'. It is divided into four themed zones ... The Botanic cloud, The Hill, The Valley and The Oasis.

Botanic cloud, the first zone trees are like a part of the sky creating green clouds as you walk in through the boulevard.

The second zone, the Hill has the Club. Landscaping and architectural splendour will merge here to create a sense of a hill going up to a sky lounge from a distance.

The next one ... the Valley. Hidden greens and design here will create a difference in landscape levels ... with green spaces, activities, features and water.

The last one ... the Oasis. This garden area will be segregated at different points between the houses. Conceptualised to create spaces using the five senses ... Romantic garden, Butterfly garden, Herb garden, Fruit orchard and a Relaxation garden, Oasis will surely quench the thirst of your eyes.

Indian Green Building Council features

Rainwater harvesting

A rainwater harvesting tank installed in BOTANICA would collect the rainwater from the roof and ground floor areas and store them to reuse it for gardening and landscaping. This will not only charge and enhance groundwater levels and reduce water flow into drains but also reduce the potable water required for the project, thereby making it water efficient.

Rainwater collection

Solar power lighting for common areas

BOTANICA will house solar panels. The energy generated from these will be able to cater to the lighting of the common areas. This will make BOTANICA immensely energy efficient.

Solar powered lights in common areas

Virgin greens

The site will be restored to virgin greenlands by adequate landscaping that will offer residents ample space for relaxation and play.

Waste and garbage disposal

BOTANICA will recycle the waste water and reuse it for flushing in order to reduce the usage of potable water. The organic waste converter at BOTANICA will help manage waste in a proper way and convert the kitchen and garden waste to manure and use it for the landscaping.

Limiting water waste

Low water flow fixtures specifically designed to limit water waste will help residents reduce water consumption.

Electric vehicle charging points

With rising fuel prices there is and will be a propensity to shift to renewable resources for vehicles. Which is why, the usage of electric vehicles are on the rise. A platinum rated building will have to have electric vehicle charging points to provide residents the provisions to charge electric vehicles. Provision for a car charging point will be provided in each house.

Electric vehicle charging point

GH platinum pre-certified

Energy efficient lights

LED lights that consume almost 30% less electricity in comparison to other lights will help BOTANICA reduce the energy consumption for the building making it energy efficient.

LED lights in indoor common areas

Sunlight and fresh air

BOTANICA will have windows that are adequately sized to allow a lot of daylight and fresh air. Better indoor environmental quality will protect health, improve the quality of life, and reduce stress. In a way, it will also escalate the the resale value of the apartments.

Ample daylight through large windows in bedrooms

Use of sustainable and certified material

A platinum rated building is made of IGBC-rated sustainable products such as FSC certified wood, AAC blocks instead of fly-ash, certified lifts and low VOC paints. The material undergo rigorous scrutiny, and the quality of construction is therefore much superior. This will directly impact infrastructure and living conditions of the residents at SOLUS.

The fine art of BOTANICA

The Architect

Smallwood is an American architectural firm based in Atlanta, Georgia, founded in 1979.

The company's expertise lies in Architecture, Interior Design, Master Planning, Experiential Graphic Design and Landscape Architecture.
